# ANEST IWATA MOTHERSON

## Who Are We?

Anest Iwata Motherson (AIM) is a joint venture between Anest Iwata Corporation, Japan and Samvardhana Motherson Group, India. Anest Iwata, today stands out as a global leader in Air Compressors, Vacuum Pumps and Paint Coating Equipments & Systems with more than 9 decades of inspiring history of technological excellence.

Samvardhana Motherson Group (SMG) was established in India in 1975. Today it's a leading global auto components supplier with revenue of \$ 10.5 billion and more than 270 manufacturing units spread in 41 countries employing more than 1,35,000 people. Samvardhana Motherson Group is known globally as a very high quality automotive supplier which gives us an edge as we understand the culture and criticalities of automotive world.

As a JV between these two global giants is committed for the peace of mind its customers by supplying best of the products supported with effective after sales support at optimum value. AIM serves its customers through two state of the art manufacturing facilities and a network of sales and service partners across India.

# ANEST IWATA MOTHERSON

## OIL FREE COMPRESSOR

Anest Iwata developed Oil Free Scroll Compressor in 1991 for the first time in the world.

Clean

Oil free compressor has no oil in the compressed air, therefore no need for oil filter and oil catch tank. Class 0 (ISO8573-1:2010[---0]) certified. Class 0 is TÜV-tested.

### Class Zero Certification

TÜV (independent third party test house) has certified that the air quality from our oil free scroll compressors is in conformity with "Class 0 (ISO8573-1:2010[---0])"

### What is Class Zero?

ISO8573-1 (JIS B8392-1) defines quality classes for compressed air. Class Zero indicates that wall flow oil, oil mist and oil vapor are completely absent. As oil vapor in particular cannot be absorbed by conventional air filters, it is important for factories that require clean air use Class Zero compressors.

- ① Wall Flow Oil
- ② Oil mist
- ③ Oil vapor

CLASS	Oil Concentration mg/m <sup>3</sup>
0	As specified by the equipment user or supplier and more stringent the Class 1
1	≤ 0.01
2	≤ 0.1
3	≤ 1
4	≤ 5

### Contamination

Air from oil-lubricated compressors contains oil and can contaminate the piping. This does not happen with an oil free scroll compressor which produces high-quality oil free air.

Inside the piping of  
- lubricated compressor

Inside the piping of  
free compressor

### Internal Structure

Oil free compressor has no oil in the compressed air, therefore no need for oil filter and oil catch tank.

## Easy Maintenance

Oil free compressor does not require replacement and inspection of lubrication, it is very easy for daily inspection. Generally, as the buses and trucks lubricate the compressor with engine oil, then if using oil lubricated compressor electrically without engine, a daily inspection of oil is required.

### Oil Lubricated Scenario

- Daily**
- Check oil level
  - Check emulsification of oil
- Every month**
- Replace oil
- Every year**
- Clean oil alarm
  - Check oil alarm operation

### Oil Free Scenario

Scroll compressor does not need maintenance of oil.

## Technology Options

Anest Iwata Motherson has solutions for Transportation compressors for Railways Metros and E- Buses in all possible technologies.

Depending on OEM's preference, we can offer a solution but as our contribution to clean environment, we prefer Oil Free Technology

Scroll compressor

19 Kg

Screw compressor

45 Kg

Piston compressor

44 Kg

Improve efficiency by light weight silent & less vibrating scroll compressor.

## Railway and Metros

# New Products

Coming soon

**High durability**

15,000 hrs maintenance cycle at 0.8MPa model (50% up)

**High efficiency**

Improve air volume (maximum 20% up)

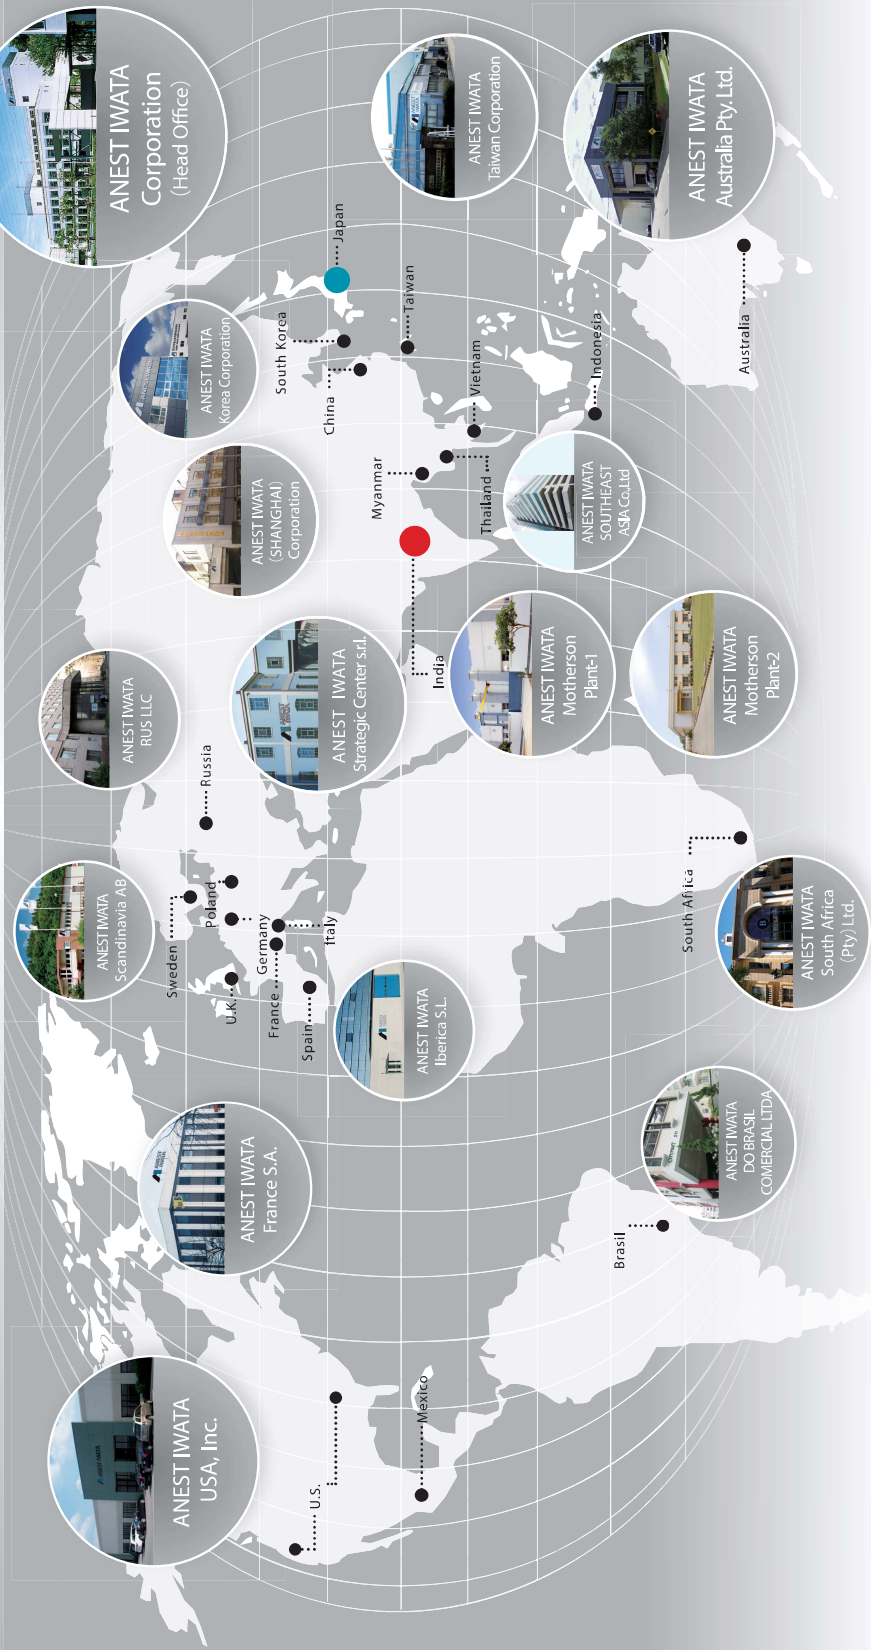

**High pressure**

Maximum working pressure is at 1.3MPa

Model	ESL-180 series		ESL-220 series				
Output	3.7		5.5		7.5		11
HP	5		7.5		10		15

## Heavy Duty Reliable Air Compressors Developed for Indian Railways

**1000 LPM**

### For Conventional Electric Locomotives

TECHNICAL DATA - LPM 1000	
1	Model LPM 1000
2	Type of Compressor Base Frame Mounted Lubricated Reciprocating Compressor
3	Type of Motor 14 HP , 3-phase, T.E.F.C foot mounted
4	FAD 1080LPM(38.16cfm)
5	Working Pressure 10 Bar
6	Overall Size(L x W x H) in mm 1140 x 790 x 870

### For Three Phase Electric Locomotives

**1750 LPM**

TECHNICAL DATA - LPM 1750	
1	Model LPM 1750
2	Type of Compressor W.Type Reciprocating, Lubricated, air cooled Compressor
3	Type of Motor 20 HP , 3-phase, T.E.F.C foot mounted
4	FAD 1750 LPM (61.8cfm)
5	Working Pressure 10.2 kg/cm <sup>2</sup>
6	Overall Size(L x W x H) in mm 1410 x 810 x 745

Note

\* Specification described in this catalog are subject to change without notice for product improvement. Depending on specification change, photos and contents may differ some products

# GLOBAL ONE

## Why ANEST IWATA MOTHERSON?

- Pioneers in Technology
- Global Experience
- Japanese Reliability
- Strong After Sales Support
- Railway Compressor approved by RDSO
- Tailor Made customised products as per OEM needs
- Backed by the expertise of Anest Iwata and Samvardhana Motherson Group
